

WHAT IS UNITOPIA?

UNITOPIA is owned and operated by TOPIA Network. TOPIA Network is a decentralized application and gaming platform on the TRX Blockchain. **UNITOPIA** will bring the birth of a fully featured multi-chain casino.

UNITOPIA holders will receive a rake equal to 10% of the house edge for EVERY CURRENCY and EVERY GAME offered on the UNITOPIA platform. The **UNITOPIA** Casino is a state-of-the-art multi-currency platform, and with all of the popular games: Dice, Ring, Crash, Blackjack, Video Poker, Hilo, Slots, Standard Table Games, and Sportsbook.

It also features a revolutionary rewards model that has yet to be seen in the space.

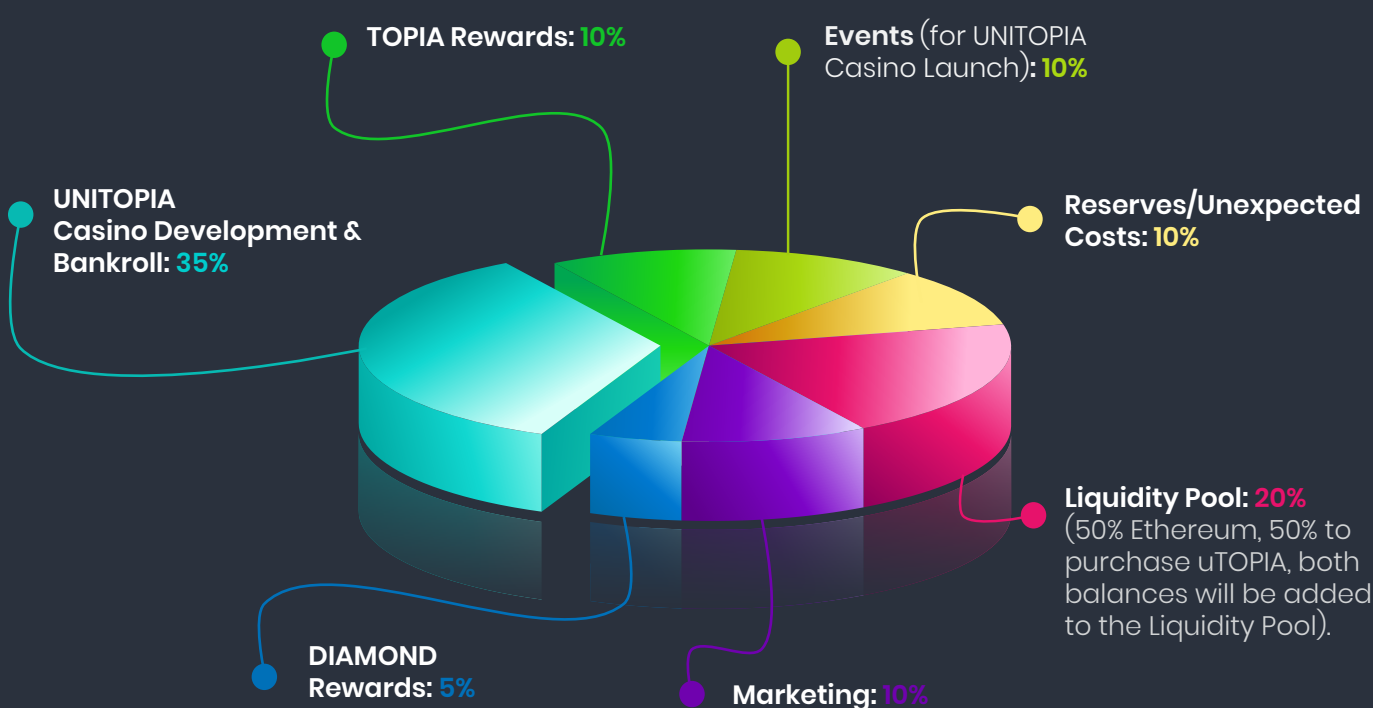

What benefit does UNITOPIA Token offer me?

- UNITOPIA has a very small fixed supply of 1,000,000 Tokens that will EVER be in existence.
- This token will provide access to Rewards from the UNITOPIA Casino Platform that no other token will be able to receive.
- UNITOPIA Casino will have many games with various house edges.
- UNITOPIA Token holders will receive 10% of that house edge for every game, and every currency we offer to be playable.
- These rewards will be automatically exchanged into Ethereum, and airdropped to all uTOPIA holders every week.

Where does the Ethereum raised go?

The Ethereum Raised will be split into various budgets:

Ethereum raised will be distributed in stages as it is raised. Every 20% acquired will be distributed accordingly to the above breakdown. This means the UNITOPIA Liquidity Pool, TOPIA, and Diamond Reward Pools will receive 5 injections throughout the process.

What benefits does this bring to TRONTOPIA and any future onchain platform?

Onchain TOPIA platforms will **benefit** in multiple ways:

In the short term, they will be receiving a substantial injection to their reward pools.

In the long term:

- Completely revamped UI and user experience. Smoother gameplay, faster speeds, and less reliance on node connectivity for everything to function properly.
- Access to wide ranges of new games that will be easily offerable onchain as well as offchain. Many providers are easily configurable to work across various methods.
- Opens the door to a much larger and broad playerbase.
- Less reliant on TRON success directly.
- Umbrella ecosystem - The Umbrella is the key component that onchain token holders need to remember. Once TRONTOPIA token has been mined fully, it joins the umbrella. The umbrella receives a share of EVERY topia platform's revenue. This includes UniTopia.
